NOTES

- All dimensions in millimetres. Datum is the lower-left corner of the board outline; X to the right, Y up, viewed from the component side.
- Hole and Pmod positions are ordinate dimensions from that single datum, so they do not accumulate tolerance.
- Geometry is design nominal, read from the KiCad board file.
- 2 further note(s) omitted for space; the full set is in the data module this sheet was generated from.
