NOTES

- All dimensions in millimetres. Datum is the lower-left corner of the board outline; X to the right, Y up, viewed from the component side.
- Hole and Pmod positions are ordinate dimensions from that single datum, so they do not accumulate tolerance.
- Geometry is design nominal, read from the KiCad board file.
- Pmod host headers are on a 22.86 mm (0.9 in) pitch, per the Digilent Pmod Interface Specification 1.2.0.
- The Pmod host headers along the lower edge are what a mounting plate has to register against. Their 22.86 mm pitch is identical on every Tiny Tapeout demo board revision, but their distance from the lower board edge and their absolute position along it are not.
- Tolerance, unless a dimension says otherwise: +/-0.20 on the routed board edge, +/-0.10 on hole position, +/-0.08 on hole diameter.
