

NOTES

- 1. All dimensions in millimetres. The datum symbol marks the origin: the board's lower-left corner, X right, Y up, seen from the component side.
- 2. Geometry is design nominal, read from the KiCad board file.
- 3. Hole IDs are the board's own reference designators from the KiCad file, not assigned by this drawing, and are in no positional order.
- 4. No other demo board revision shares this geometry.
- 5. Pmod host headers are on a 22.86 mm (0.9 in) pitch, per the Diligent Pmod Interface Specification 1.2.0.
- 6. This revision has no row in Tiny Tapeout's board revision spreadsheet, which lists DB ETR v3.2 as the current demoboard. The name used here follows that ID; no shuttle is known to have shipped on it.
- 7. The Pmod host headers along the lower edge are what a mounting plate registers against. Their 22.86 mm pitch is the same on every revision; their distance from the lower edge and their position along it are not.
- 8. The chain-double-dot rectangle at each Pmod host is the connector body where it overhangs the edge: what a peripheral and a bracket must clear.

NOTES (continued)

- 9. Pmod host coordinates are given to three decimals, unlike the rest of this sheet. Rounded to two, adjacent hosts print 22.85 apart and contradict the 22.86 pitch dimensioned here.
- 10. Port names differ by family: JA, JB, JC on the adapter and Raspberry Pi sheets, by signal direction on the demo boards, PMOD 1 to 3 on the plate sheets. TT-MP-02 maps them.
- 11. Board thickness is 1.6 mm nominal. The KiCad file's 1.56100 mm is its stackup sum, not a specified finished thickness.
- 12. Assembled envelope, connector overhang included, is 85.00 x 86.65 mm against a 85.00 x 85.00 mm board outline. The FEATURE SCHEDULE gives the extents.
- 13. Feature numbers are fixed across this family, so a number means the same part on every sheet. A part this board does not carry still has a row, marked as such.
- 14. GENERAL TOLERANCE in the title block is a normal board-house figure, not one any source here states.
- 15. Generated from the listed sources and not checked by a second party: there is no CHECKED field because nobody has signed it.
