JA	left edge	9.40	39.29
JB	left edge	9.40	16.43
JC	bottom edge	27.60	9.40

1. All dimensions in millimetres. Datum is the lower-left corner of the board outline; X to the right, Y up, viewed from the component side.
2. Hole and Pmod positions are ordinate dimensions from that single datum, so they do not accumulate tolerance.
3. Phantom outline is the Diligent Pmod HAT Adapter fitted to the 40-pin GPIO header. Its Pmod host positions are given in this board's coordinate frame, since the adapter's mounting holes coincide with this board's.
4. Connector outlines are the component body as drawn by Raspberry Pi Ltd, including any overhang past the board edge.
5. Mounting hole diameter: Hole diameter dimensioned on the drawing as $\phi 2.7$; the keep-out circle is drawn and measures 5.80.
6. The two 3.0 mm holes are additional to the four M2.5 mounting holes, and sit 6.0 mm from the nearer mounting hole on the board diagonal.
7. Hole positions are the 3.5 mm inset and 58 x 49 mm rectangle dimensioned on this model's own drawing.
8. Pmod host JC on the Pmod HAT Adapter overhangs the lower board edge in the same region as this board's HDMI and power connectors. Diligent's own reference manual warns to fit the two standoffs opposite the 40-pin connector so that JC's pins cannot touch the HDMI shell.
9. Pmod HAT Adapter: DERIVED DIMENSIONS. Diligent publish no mechanical drawing, DXF, STEP or board file for this product. Pmod host positions were measured photogrammetrically and are good to about ± 0.75 mm.
10. Pmod HAT Adapter: JA and JB face out of the left edge, JC out of the lower edge. All three are right-angle hosts: the connector body overhangs the board edge by roughly 3 mm and the through-hole field sits about 9.4 mm in from it, so a mating Pmod peripheral plugs in from the side that edge.

11. Pmod HAT Adapter: JA and JB are snapped to the 22.86 mm host spacing the Pmod Interface Specification mandates, they measured 22.86 mm apart in <https://www.raspberrypi.com/rpi5/raspberry-pi-5-mechanical-drawing.pdf> - Raspberry Pi Ltd

12. Mounting holes in <https://datasheets.raspberrypi.com/rpi5/raspberry-pi-5-mechanical-drawing.pdf> - Hole ID are not in the same position on the 4x0.063 in plate, the hole pattern is the same, but the board measurements are 90 otherwise.

85 x 56 mm
